

HiCare™

Waterless Shampoo

IN-SERVICE HANDOUT

CLINICAL APPLICATION

'In-bed' use - no water required. The 60ml pack will be sufficient for no less than 4 to 6 shampoos of shoulder length hair.

PREPARATION

Simply remove the plastic cap from the bottle, no other materials required.

HOW TO USE

Depress the foam head on the pack a number of times to obtain the shampoo. Apply directly to dry hair until hair is wet and massage through. Then comb/brush the hair to air dry or towel dry if required.

Do not add water, this is a rinse free product.

HOW DOES IT CLEAN?

- The surfactant cleanser in the waterless shampoo returns the hair to its neutral pH. The surfactant also emulsifies any oil, dirt, grease, grime or perspiration from the hair.
- The HiCare Waterless Shampoo also contains the protein Keratin, which nourishes and strengthens the hair shaft.

CONTRAINDICATIONS FOR USE

Note: Bleach treated hair may look 'untidy' dry, when HiCare Waterless Shampoo is used - it will however be cleansed.

EVIDENCE BASED STUDIES

1) Independent dermatological consumer studies in the USA (report). There were no negative outcomes, no allergic reaction or sensitivity to HiCare Waterless Shampoo.

PRODUCT SAFETY

Each manufactured batch is subject to repeat QA at our Sydney laboratory prior to distribution.
